KEY PROJECTS

Personal Portfolio Website

whereisrico.dev

- Designed, built, and deployed a full-stack portfolio site on AWS entirely via CLI — live at whereisrico.dev.
- Configured S3 for static hosting, CloudFront for global CDN and HTTPS, Route 53 for DNS, and ACM for SSL/TLS.
- Built a serverless contact form backend using Lambda (Python), API Gateway, and SES with least-privilege IAM roles.
- Implemented a CI/CD pipeline using GitHub Actions that auto-deploys to S3 and invalidates CloudFront on every push.
- Built a custom analytics pipeline using CloudFront access logs, S3, and AWS Athena to query visitor data with SQL.
